

??DO YOU KNOW ABOUT??

the

Competitive **P**ower **V**entures' **POWER PLANT?**

It's a 650 MW fracked-gas electric plant
currently under construction in

WAWAYANDA

(on border with Middletown, NY)
between Routes 17M, 6 and 84

It would be ***13 stories high*** and have emissions ***stacks 27 stories high***
It would use fracked gas brought across our farms and fields through an extension of the Millennium Pipeline

***EMISSIONS WOULD AFFECT ALL LIVING WITHIN A 30 to 50-
MILE RADIUS***

(Wawayanda, Middletown, Goshen, Minisink, Otisville, Florida, Warwick, Chester, Monroe, Newburgh, Harriman,, Milford, Matamoras, Sussex, Newton and beyond)

THIS WOULD AFFECT OUR HEALTH and SAFETY

****Explosive risks:*** 15,000 gallon ammonia tank, 965,000 gallon diesel fuel oil tank by I84

*2.1 million tons per year of CO2e as well as VOCs, nitrogen oxides and particulate matter-- creating ground level ozone which is linked with respiratory diseases, cancer, stroke, and premature death

*the fracked gas to be used is highly radioactive

*Endangered species and wetlands would be destroyed

****Increased risks of asthma and autism in children:*** frail and elderly may face increased risk of cardiovascular and respiratory illnesses

THIS WOULD AFFECT OUR WALLETS

Plummeting property values!

This will add only 25 *permanent jobs*

Paid for by tax payer and ratepayer subsidies - Up to **16 percent rate hike** for the Lower Hudson Valley to pay for this. The electricity would be sold in the wholesale market, not to local residents -- studies have shown there is no supply need in our area.

JOIN OUR WEEKLY PICKET LINE AT THE PLANT SITE: Join us 11am to 12 noon every Saturday: on Route 6, a half mile south of Route 17M. Pull to the side of the road and say hi!

LAWSUIT TO STOP THE PLANT IS IN PROCESS: Attorney Michael Sussman on behalf of concerned citizens is pursuing a suit to demand a new environmental impact study. We are currently at the appeal stage; the lawsuit needs your financial support.
